

GREEN DATA PROGRAM

Where Data Meets Sustainability

Learn how data and policy come together to tackle some of the biggest challenges in sustainability. This two-year program brings together students focused on making an impact in public policy and sustainability through data, helping you build tangible skills and launch your career.

Through the program you'll have the chance to collaborate with experts from:

- Harris School of Public Policy
- The UChicago Data Science Institute
- Career Advancement

Start Your Career in the Fast Lane

- Competitive advantage by starting the program your first year
- Two years of intensive preparation for careers of the future
- Explore specialized graduate programs

Get Hands-on Experience

- Technical skill development workshops and training in data science frameworks and more
- Experiential education opportunities through career treks, policy simulations, and competitions
- Funding for research experiences and pre-professional internships

Engage with Experts

- Collaborative projects with staff and faculty on sustainability
- Networking opportunities with alumni, data science experts, and policy professionals
- Tailored career advising and support from Career Advancement

GET STARTED

All members of the Class of 2026 are welcome to apply to the Green Data Program. Students interested in data science, policy, sustainability and those from underrepresented backgrounds are strongly encouraged to apply. For priority consideration, apply by July 20!
