

# PROTOTYPE FOR SUCCESS

## Innovation, Down to a Science

Bring your ideas to life with UChicago's Prototype for Success program! This two-year program immerses students in the theory and practice of entrepreneurship in STEM, which presents unprecedented possibilities for scientific discovery, commercial ventures, and social impact.

Along the way, you'll have personalized support from experts at:

- Pritzker School of Molecular Engineering
- Polsky Center for Entrepreneurship and Innovation
- Career Advancement

### Start Your Career in the Fast Lane

- Competitive advantage by starting the program your first year
- Two years of intensive preparation for careers of the future
- Explore specialized graduate programs

### Get Hands-on Experience

- Funding for internships and research experiences
- Practical skill development such as design thinking, project management, and writing business plans
- Engineering challenges and immersion projects

### Engage with Experts

- Access to PME faculty
- Personalized support from Polsky Center and Career Advancement
- Network with entrepreneurs, scientists, and employers

## GET STARTED

All rising first-year students are welcome to apply to the Prototype for Success. Students interested in engineering and those from underrepresented backgrounds are strongly encouraged to apply.
